by Research via distance learning

People moving forward

Doctor of Professional Studies (DPS)

The world of professions is constantly evolving. The epochal changes we are witnessing in the new millennium pose a challenge to our capabilities. Sometimes, we end up questioning whether we are engaging in our work with an appropriate level of expertise, feeling adrift in a sea of uncertainty. In a turmoil of changes, with the advent of digital transition and new artificial intelligence systems, our customers and stakeholders may wonder if we are still capable of performing adequately, adapting our professionalism to future challenges.
The Doctor of Professional Studies (DPS) answers this question, representing the most effective way of certifying our professional skills. A DPS specifically focused on our area of expertise proves our experience, our competence and our active commitment to professional growth. And most importantly, it shows that we are professionals, managers or entrepreneurs able to contribute effectively, with the power of our ideas, to current global innovation processes. Creative people, ready to face the future with awareness and proficiency.

We recognize the real value of people

In a period of rapid changes, the most qualified profiles must be able to be recognized for their real value and actual competence; the Doctor of Professional Studies (DPS) responds effectively to this new need. **Unlike any other traditional university programs, the DPS by Research does not consist of any coursework, classes or lectures to attend, either on campus or online.** Rather, it is based on a Project Work that the candidate has to carry out autonomously on a specific professional topic among the available faculties of Terra Nova University.

The Doctor of Professional Studies (DPS) certifies the skills acquired by the candidate, as shown by his/her career and Project Work. Specific degrees like Doctor of Science (DS), Medical Doctor (MD), Juris Doctor (JD) require years of laboratory experience or professional. Therefore, they are not available at Terra Nova University, since it should be quite clear that any laboratory method or professional practice cannot occur online or through any distance learning system.

The program has no minimum duration, whereas a maximum duration of 18 months. Since it does not have any intake or admission deadline, students can apply any time of the year.
The main requirement for a Doctor of Professional Studies by Research is to carry out a Project Work, having a minimum length of at least 90/100 pages. It can be a technical, scientific or business essay, or even an academic thesis, on a topic of choice related to the candidate's background.

How to apply for the DPS (Doctor of Professional Studies) by Research

In order to be eligible for Terra Nova University's DPS by Research, any candidate must be at least 30 years old.
To apply for the program, please send the application form, duly filled in and signed, together with your detailed CV, a copy of your passport or ID card and a passport size photo to our email address: **info@terranova.university**

The final and total cost of the DPS program is **€ 2250** (two thousand two hundred fifty euros)

It is all-inclusive: ongoing student support, general supervision and evaluation of the Project Work, issuance and shipment of the certificates, authenticated via Blockchain technology.
To promote global access to study, Terra Nova University has minimized the cost of its programs, even without receiving any economic or financial contribution from public or third-party institutions. **Therefore, no scholarships or discounts whatsoever are provided.**

In case the application is accepted, our Secretariat will send via email the Enrollment Certificate and the Payment Plan chosen by the candidate.

Being a professional title, The Doctor of Professional Studies (DPS) does not require any defense of the final Project Work, even if structured as an academic thesis.
